Instructions to install expEDIum Functional Acknowledgement Reader

STEP 1:

- Ensure Java run time is installed first (JRE 1.4.x or above).
- Run a command "java -version" from a command prompt. If Java is installed it displays the following (or similar) information. *Java version "1.5.0"*
Java(TM) 2 Runtime Environment, Standard Edition (build 1.5.0-b64) Java Hotspot(TM) Client VM (build 1.5.0-b64, mixed mode, sharing)

STEP 2:

- If Java is not already installed, download JRE 1.4.x or above from the Sun website at <http://www.java.com/en/download/manual.jsp>
- Choose "Windows (Offline Installation)" from this website and download the latest version of JRE available.
- Once downloaded, run the `jre-1_5_0_06-windows-i586-p.exe` (note the file name may be different based on the current version of JRE available at the Sun website) to install the JRE. Once JRE is installed, run the command from step 1 above to ensure that JRE is installed successfully.

STEP 3:

- Now unzip the `expEDIum-FARReader.zip` in a temporary directory. This result in 3 files, namely
 1. `FARReader.jar` ☺ this is an executable jar file.
 2. `Aboutus.htm`
 3. `InstallDetails.htm`
- The file `FARReader.jar` is a "Java Archive File" and is a self executable. By double clicking on this file, installation program comes up and please just follow the prompts.
- If the above command does not work, please try the command `"java -jar FARReader.jar"`.
- The following screen (Figure-1) appears when the above command is executed. You can change the installation directory to a directory of your choice.

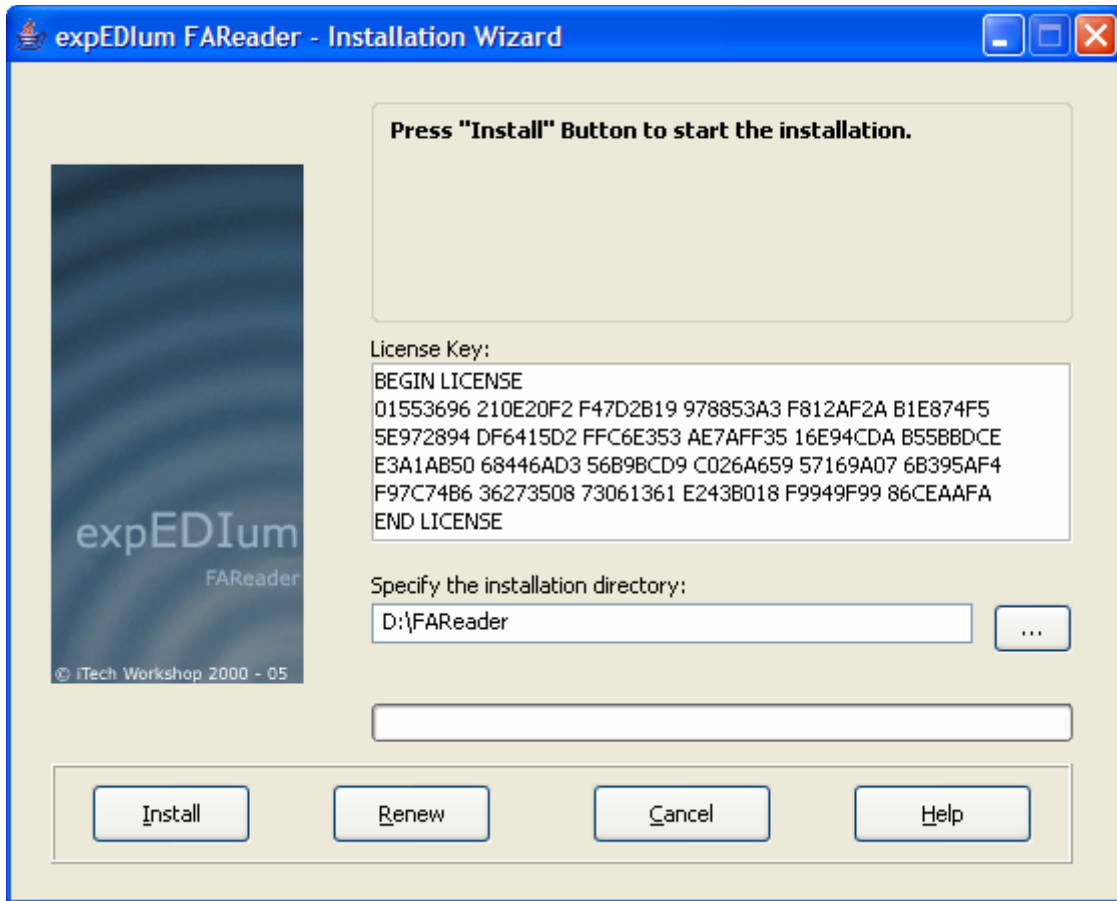

Figure-1

- Once the installation is complete the following screens appears (Figure-2) and press the "Finish" button to exit the installation program.

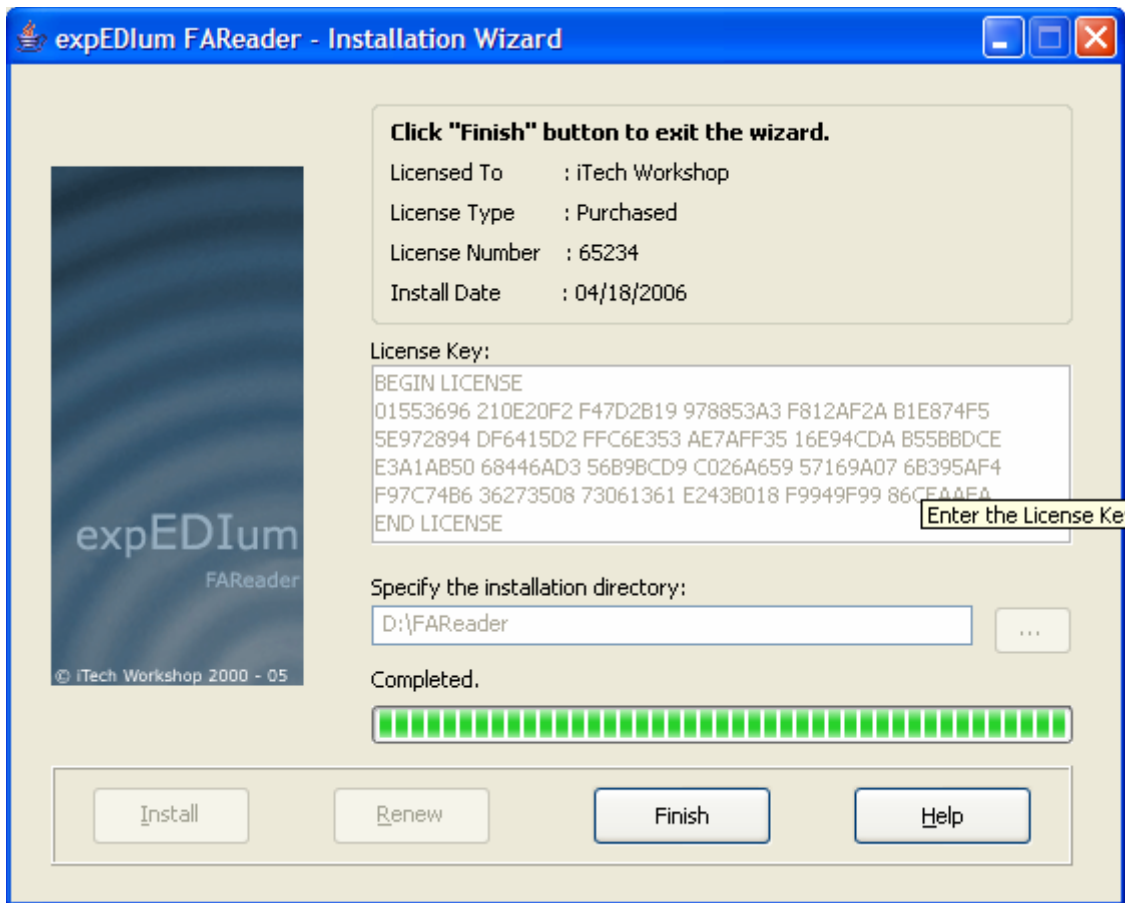

Figure-2

STEP 4:

- For additional information follow the Readme-1st.txt file and the HTML (expEDIumFARReader-V1.0.htm) help file supplied with the download.
